

1 LIMIT LAWN WATERING, ESPECIALLY DURING A DROUGHT¹

Lawns naturally go dormant during dry conditions. They'll revive when conditions improve.

- If you are in a region at Drought Level 3, **Critical Drought** (Severe Drought Conditions) or Drought Level 4, **Emergency Drought**: Do not water your lawn.
- If you are in a region at Drought Level 2, **Significant Drought** (Moderate to Severe Drought): Limit watering to hand-held only or drip irrigation. Water after 5PM or before 9AM to avoid evaporative losses.
- If you are in a region at Drought Level 1, **Mild Drought** (Abnormally Dry Conditions): Limit watering to 1 day per week at most. Water after 5PM or before 9AM.

2 MINIMIZE LANDSCAPE WATER NEEDS THROUGH WATER-SMART LANDSCAPING PRINCIPLES²

- Maintain healthy soils (a minimum of 6-inches in depth, where possible).
- Choose native plants or plants and turf that need less water.
- Use mulch to reduce evaporation and moderate soil temperature.
- Leave grass clippings on lawn to shade and return nutrients to soil.

3 MINIMIZE YOUR USE OF WATER OUTDOORS

- Sweep driveways, walks, patios, and other outdoor areas with a broom rather than hosing them off.
- Wash vehicles using a bucket and sponge, employing a hose with a shut-off nozzle for rinse only, or, if available, use a commercial car wash that recycles water (most do).
- Cover swimming pools when not in use to prevent evaporation.

¹ Certain water uses are not subject to mandatory restrictions, such as water used: for health or safety reasons; for the production of food and fiber; for the maintenance of livestock; to meet the core functions of a business (for example, irrigation by plant nurseries as necessary to maintain stock)
